

Ages 6+  
3 - 4 Players

## Contents

- 32 Reflex Cards - 4 each of Red, Orange, Yellow, Green, Blue, Brown, White and Pink featuring a large colored spot with lightning bolt.
- 80 Action Cards - 10 of each color featuring an object and hand direction - left or right.

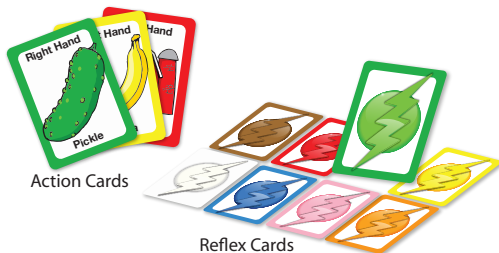

## Object

Be the first player to collect one of each of the eight colors of the Reflex Cards.

## Setup

Separate the cards into two decks - Reflex Cards (larger cards) and Action Cards (smaller cards). Sort the Reflex Cards into stacks by color.

Place them in two rows of four in the center of the table where everybody can reach. Shuffle the Action Cards and place them in a stack face down nearby.

## Playing the Game

Players take turns reading the top card from the Action Deck aloud. The youngest player goes first.

On your turn to read, place the deck of Action Cards in front of yourself. Turn over ONLY the top card of the deck and look at it without showing the other players. Then, very quickly, say aloud what's on the card.

All other players will race to slap one of the Reflex Cards on the table. They must use the proper hand - RIGHT or LEFT - and be the FIRST to slap the card that matches the color of what was announced.

For example, if the reader announces "Right Hand, Corn" you must use your RIGHT hand to slap the YELLOW card, because corn is yellow. If you're the first to slap the correct Reflex Card with the proper hand, you keep that card.

**If you are the reader, you do not get to attempt a slap.**

Continue to take turns reading and slapping to collect cards.

## Oops!

If you're the first player to slap the correct Reflex Card with the proper hand and it's the same color as a card you've already collected, you do not get that card. As a penalty, you must also put back the card of that color you collected previously. In other words, if you already have a yellow card

and slap another yellow card, you will no longer have a yellow card.

If you're the first to slap, but accidentally slap the **correct color** with the **wrong hand**, nobody collects a card. The round ends. Pass the deck to the next player who then becomes the reader.

If nobody slaps the correct Reflex Card, the reader announces the answer. Nobody collects a card. The round ends. Pass the deck to the next player who then becomes the reader.

## Winning the Game

If you're the first player to collect one each of the eight differently colored Reflex Cards, you have RAPID REFLEXES and you win the game!

## Remember...

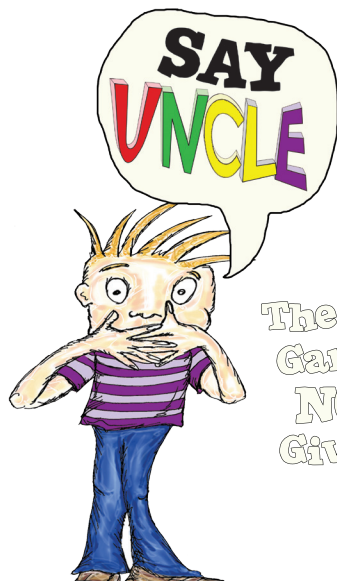

Rapid Reflex is a game of fast-paced fun. While all players want to be the first to win a Reflex Card each round, please play safely and always be respectful.
