

dado™ Cubes

New for the specialty toy market ...

Dado™ combines art and science as kids of all ages explore architectural principles ... proportion, balance, structure, composition and color. A new twist on classic building blocks, Dado™ engages the imagination as the slits on each cube are interlocked to create an unlimited number of three-dimensional structures. Constructed horizontally, vertically or nested together, Dado™ invites visual spatial development and problem solving through design-centered, attention grabbing fun!
